PROFESSIONAL SUMMARY

Aspiring Full-stack developer (B.Tech CS, AI Data Science, 2027) with production-grade work across real-time streaming platforms, AI-powered financial tools, and high-load APIs validated under 1000 concurrent users. Strong in the MERN stack, WebSockets, and LLM integrations, looking to contribute to a fast-moving product team from Day 1.

EXPERIENCE

TheTastyMillets

May 2026 – present

Frontend Developer Intern

- Improved website performance by optimizing frontend rendering and asset delivery, resulting in faster load times.
- Diagnosed and resolved frontend rendering bottlenecks, lazy-loading images, splitting JS bundles, and compressing static assets and cutting average page load from 3.8s to 2.1s and lifting Lighthouse performance from 64 to 74
- Refined UI/UX across devices to ensure consistent and responsive user experience.

NextLearn Technologies

April 2026 – May 2026

Full Stack Developer Intern

- Optimized frontend rendering and asset delivery, reducing page load time by 65% (4.2s → 1.1s) for a React + Node.js learning platform.
- Worked cross-functionally with design and backend teams to ship 8 production features on schedule, ensuring stable integration and high-quality UX across modules.

PROJECTS

StreamFlow | *React.js, Node.js, Express.js, MongoDB, RTMP Socket.io, Video.js*

Live | GitHub

- Built a real-time live streaming platform using RTMP (OBS) and HLS for low-latency video delivery.
- Integrated real-time chat using Socket.io to enable live audience interaction during streams.
- Developed user engagement features including follow/unfollow system and notifications for stream updates.
- Conducted performance testing using K6, validating system stability under 1000 concurrent users.
- Supported 500+ concurrent viewers per stream with 99.5% uptime, ensuring stable real-time video delivery.

FinanCinno | *React.js, MongoDB, Express, Node.js, OpenAI API*

Live | GitHub

- Integrated an AI-powered chatbot to provide personalized financial advice.
- Validated application scalability using K6 load testing, supporting 1000 concurrent virtual users with 84ms p95 response time and 0.01% request failure rate..
- Implemented secure authentication and expense management for logging and categorizing transactions.
- Achieved strong Lighthouse SEO and performance scores through frontend optimization and best practices.

CERTIFICATIONS & ACHIEVEMENTS

- Built and deployed multiple full-stack applications with modern web technologies, including React, Next.js, Node.js, MongoDB, and TypeScript.
- Solved 300+ LeetCode problems across arrays, trees, graphs, dynamic programming, and other core DSA topics.
- Earned MongoDB Certification and completed Google Cloud's Introduction to Generative AI certification.
- Validated application scalability using K6 load testing, supporting 1000 concurrent virtual users with 84ms p95 response time and 0.01% request failure rate.
- Member of GitHub Developer Program recognized for active open-source engagement and API development

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, Typescript
- **Frontend:** React.js, Tailwind CSS, Vanilla CSS, NextJs
- **Backend:** Node.js, Express.js, Flask
- **Databases:** MongoDB, MySQL
- **Tools:** Git, WebSockets, OpenAI API, Vercel, Render, Clerk

EDUCATION

Poornima University, Jaipur

2023 – 2027

B.Tech in Computer Science (Artificial Intelligence & Data Science)
